

Macadabra
RINET

KEYED UP

is an exciting and innovative approach to teaching and learning the Keyboard. Nancy Litten carefully guides the student through a series of well-known and catchy melodies and adds learning concepts along the way. So the student simply enjoys the journey whilst acquiring new skills - as Nancy says in the preface:

"It has been discovered that the main reason why pupils discontinue lessons is because of a lack of opportunity to play with others. It is assumed that if they are joined in a class they will enjoy it. Modern research has discovered the reverse is more likely: if they enjoy something they will strive to become good at it."

"This book works very well with mixed-ability groups. It begins with easy notes leading the way. Then are more notes to assist in solo work. The book covers a variety of notes including fast-paced material. The CD gives immediate feedback through appropriate software. This gives the learner time to focus on the task."
